Art Unit: 3735

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 has the steps of deploying the at least one locator element and delivering energy to the target tissue. Claims 21 and 24 recite that the "step of deploying" further comprises delivering energy making the limitations of the steps unclear. It appears that the delivering step has already been recited as delivering the energy, it is unclear how both the deploying step and the delivering step can both do this, it appears that the language of claim 1 is the correct language. Also it appears that claims 21 and 24 are substantial duplicates of each other since they define the same method step of delivering the energy to the distal end by turning on the source of energy coupled to the locator element.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3735

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 16-33 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 28, 32-37, 49, 61, 67, 94, 98-103, 115, 127, 133 of U.S. Patent No. 6,564,806. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a method and device for locating and delivering energy to a target tissue having a locator element having a curved distal end that has a source of energy coupled to the locator element that penetrates through tissue, deploys the locator element to encircle or surround the target tissue and delivers energy to the target tissue by turning on the source of energy and/or energizing. While the claims of '806 further include a deployment tube the elimination of an element and subsequent loss of its function is considered to be an obvious expedient to one skilled in the art if the remaining elements perform the same functions as before.
